

Why we should use BLC and ELC approach to write java program ?

-----  
If we write logic and execution, everything in a single class then it is not a recommended way because in this approach,  
THE REUSABILITY OF BLC CLASS IS NOT POSSIBLE.

In order to reuse our java classes from same package or even from different packages we should use BLC and ELC approach as shown in the Program.

com.ravi.m1 (m1 folder)

```
Rectangle.java public class Rectangle
{
}
ELC.java
class Square{}
public class ELC
{
    public static void main(String []a)
    {
    {
    }
    }
}
```

com.ravi.m2 (m2 folder)

```
Main.java
-----
public class Main
{
    public static void main(String [] args)
    {
    {
    }
    }
}
```
